HARDY NATIVE EVERGREENS—

FOR NURSERY AND REFORESTATION

The trees listed below are carefully collected from the northern Green Mountains of Vermont. All are selected, well-rooted trees, protected from wind and sun as gathered and immediately puddled in clay. Shipments are made at once with stock carefully packed in sphagnum moss.

With proper care a reasonable percentage is guaranteed to live.

The usual spring shipping season begins April 10th* and extends through to June 10th. Fall shipping is from about August 20th to December 1st. We ship earlier or later if weather permits.

Orders are filled in the order received unless otherwise arranged.

We gladly book orders in advance for this coming fall or next spring.

Evergreen seedlings up to 9 inches should be bedded for one year with shade through the summer months. Larger sizes are suitable for lining out in the open field.

* Balsam Fir—May 10th.

TREES FOR REFORESTATION

For reforestation we suggest Hemlock, Spruce, Balsam, White Pine, Sugar Maple, Yellow Birch and White Cedar.
